

Design your own Roman Mosaic

Tips:

Roman mosaics often had a geometric pattern around the edge. They showed scenes from myths and legends, gladiators, flowers and animals.

What will you design? Have fun!

Make your own Roman Mosaic

You will need:

- old magazines
- scissors
- glue
- paper or card

Instructions:

1. First cut out lots of pictures from your old magazines.
2. Sort the pictures into colours
3. Now cut them up into neat strips, about 1cm across.
4. Cut the strips again, until you have a pile of coloured squares.
5. Start making your design. When you are happy, with your patterns, glue the squares down onto a piece of strong paper or card.

Your mosaic is complete!

Good Luck!
